Apply Now

We are seeking a dedicated and experienced Data Engineer to join our Chicago team. The ideal candidate is energized by working in a cutting-edge environment that enables IMC to continue to be at the forefront of the evolving global financial markets.

Core Responsibilities

- Architect, develop and deploy our Big Data environment (Kafka, Hadoop, Dremio, etc.)
- Build, deploy, and monitor our data processing pipelines (Java, Python, Spark, Flink)
- Collaborate with development teams on data modeling, data ingestion, and capacity planning
- Work with users to ensure data integrity and availability
- Act as a Big Data SME and consult on a variety of data-related questions from users and developers

Skills and Experience:

- 5+ years experience working in a mature data engineering environment
- Building Kafka streaming applications and/or maintaining Kafka
- Building applications/pipelines with Big Data backends (S3, HDFS, Spark, Apache Flink or similar tools)
- SQL development skills
- data-science toolkits, especially python-based
- with Kubernetes and Docker
- Monitoring tools such as Prometheus/Grafana, Alert Manager, Alerta and
- Troubleshooting skills
- Troubleshoot and conduct root-cause analysis
- Scripting (bash, python, etc.)
